Harte Gold Corp.
(An Exploration Stage Company)
Notes to Interim Financial Statements (unaudited)
For the Nine Months Ended August 31, 2010 and August 31, 2009

1. Nature of Operations and Going Concern

Harte Gold Corp. (The "Company" or "Harte") is engaged in the acquisition, exploration and development of mineral resource properties with a focus on gold properties located in the Province of Ontario, Canada. The Company was incorporated in Ontario on January 22, 1982 and is a reporting issuer in the Provinces of Ontario, Alberta and British Columbia. The common shares of the Company trade on the TSX Venture Exchange under the symbol "HRT" and on the Frankfurt Stock Exchange under the symbol "H4O".

The Company currently owns interests in two advanced exploration projects: the Sugar Zone property, 60 km east of the Hemlo area gold mines, located on the north shore of Lake Superior and the Stoughton-Abitibi property (formerly Stoughton-Porcupine), 110 km east of Timmins and 50 km north east of Kirkland Lake. On the basis of information to date, it has not yet been determined whether these mineral properties contain economically recoverable reserves. The amounts shown as mineral properties represent costs incurred to date, less amounts amortized and/or written off, and do not necessarily represent present or future values.

Various factors including the Company's exploration results could cause significant fluctuations in the price and volume of trading in the common shares of the Company. The underlying value of the mineral properties is entirely dependent on the existence of economically recoverable reserves, securing and maintaining title and beneficial interest, the ability of the Company to obtain the necessary financing to complete development and the expectation of future profitable production.

As at August 31, 2010, the Company had working capital of \$2,222,206. The Company expects to incur further losses in the development of its properties, all of which casts substantial doubt about Harte's ability to continue as a going concern. These financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and balance sheet classifications that would be necessary if the Company were unable to realize its assets and settle its liabilities as a going concern. Such adjustments could be material. Harte's ability to continue as a going concern is dependent upon its ability to fund its exploration and development programs. While the Company has been successful in securing financings in the past, there can be no assurance that it will be able to do so in the future.

2. Significant Accounting Policies

The accompanying unaudited interim financial statements of the Company have been prepared in accordance with Canadian generally accepted accounting principles applicable for interim reporting periods. These unaudited notes to the interim financial statements do not include all disclosures required in the annual financial statements and should be read in conjunction with the audited financial statements and notes for the year ended November 30, 2009.

These unaudited interim financial statements have been prepared following the same accounting policies and methods of computation as the annual financial statements for the year ended November 30, 2009. In the opinion of management, all adjustments required for a fair presentation are included in these unaudited interim financial statements in accordance with the accounting policies of the Company.

3. Mineral Properties

The following table summarizes the Company's mineral properties expenditures:

	August 31, 2010	November 30, 2009
Mineral properties		
Balance, beginning of the period	\$ 127,702	\$ 907,702
Acquisition costs	3,400,163	-
Mineral property impairment	-	(780,000)
	\$ 3,527,865	\$ 127,702
Deferred exploration expenditures		
Balance, beginning of period	1,982,066	3,522,592
Exploration costs	871,424	435,607
Mineral property impairment	-	(1,976,133)
	2,853,490	1,982,066
Balance, end of period	\$ 6,381,355	\$ 2,109,768

Sugar Zone Property, Hemlo Gold Area

The Sugar Zone Property consists of 351 (321 previously) unpatented, unsurveyed, contiguous claims within the Sault Ste. Marie Mining Division located in Ontario, approximately 60 km east of the Hemlo area gold mines, 25 km north of White River off the Trans-Canada Highway (#17). The Company presently owns a 49% interest in 321 of the claims (51% of these are owned by Corona Gold Corporation) subject to an option in favour of Harte to acquire the balance. These 321 claims are subject to a 3.5% net smelter royalty ("NSR") in favour of the original vendors of the property which can be reduced to 2% through the payment of \$1.5 million.

The Company also holds an option on 25 claims that are subject to a 3% NSR that can be reduced to 1.5% upon payment of \$1.5 million.

Stoughton-Abitibi Property, Timmins Porcupine Gold Area

The Stoughton-Abitibi Property (formerly known as Stoughton-Porcupine property), is located along the Destor-Porcupine Fault, 110 km east of the Timmins, 50 km north-east of Kirkland Lake, Ontario and 10 km due east of the Holloway-Holt gold mine and mill and consists of a 90% interest in 9 claims and a 100% interest in 25 claims in the Larder Lake Mining Division of Ontario.

In view of the difficulties in raising equity for exploration projects, the Company has concluded that it should prioritize the Sugar Zone Property and will not be funding exploration on the Stoughton-Abitibi Property this year. Although the Company continues to evaluate alternative strategies for the Stoughton-Abitibi Property, there is no longer sufficient certainty that capitalized exploration costs can be recovered and the Company recorded an impairment provision for the full amount of this property at November 30, 2009.

4. Related Party Transactions

Certain corporate entities that are related to the Company as a result of having common officers and/or directors, provide consulting services to the Company. These expenditures, which have been recorded at the exchange amount, are in the normal course and relate to former and current officers and directors, are summarized as follows:

7. Management of Capital

The Company's objective when managing capital is to obtain adequate levels of funding to support its exploration activities and related administrative functions necessary to support organizational functioning. The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company, subject to approval of the Board of Directors, may attempt to issue new shares, issue debt or acquire or dispose of assets. The Company manages its capital structure in a manner that provides sufficient funding for operational activities and ensures the company will be able to continue as a going concern. Funds are primarily secured through equity capital raised by way of private placements. There is no assurance that the Company will be able to continue raising equity capital in this manner.

The Company defines capital as the aggregate of its shareholders' equity which is comprised of capital stock, contributed surplus, warrants and deficit. The Company invests all capital that is surplus to its immediate operational needs in short term, liquid and highly rated financial instruments, such as cash, and short term guarantee deposits, all held with major Canadian financial institutions.

8. Financial Instruments and Risk Management

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

The carrying value of the Company's cash and short term investments, receivables, accounts payable and accrued liabilities approximate their fair value due to the relatively short periods to maturity of these instruments.

A summary of the Company's risk exposures as it relates to financial instruments are reflected below:

A) Credit Risk

The Company is not exposed to major credit risk attributable to customers. Additionally, the Company's cash and short term investments are held with a high rated Canadian financial institution in Canada. The Company periodically assesses the quality of its investments with this bank and is satisfied with the credit rating of the bank and the investment grade of its short term deposits certificates.

B) Market Risk

Interest Rate Risk

There is no debt, interest bearing or otherwise currently outstanding. The Company may invest cash surplus to its operational needs in investment-grade short term deposits certificates issued by the bank where it keeps its Canadian Bank accounts.

Foreign Currency Risk

As the Company's exploration and evaluation activities are denominated in Canadian dollars and the Company's funds are kept in Canadian dollars with a major Canadian financial Institution, the Company has no current foreign exchange risk.

Business Risk

The Company's current or future operations, including development activities, are subject to environmental regulations which may make operations not economically viable or prohibit them altogether. The success of the operations and activities of Harte is dependent to a significant extent on the efforts and abilities of its management, outside contractors, experts and other advisors. Investors must be willing to rely to a significant degree on management's discretion and judgment, as well as the expertise and competence of the outside contractors, experts and other advisors. Harte does not have a formal program in place for succession of management and training of management. The loss of one or more of the key employees or contractors, if not replaced on a timely basis, could adversely affect Harte's operations and financial performance.

Commodity Price Risk

The price of the common shares in the capital the Company, its financial results, and exploration and development activities are exposed to commodity price risk due to changes in the price of gold or other metals it may discover. Gold prices fluctuate widely and are affected by numerous factors beyond the Company's control such as the actions of central banks, financial institutions, expectations of inflation or deflation, currency exchange rate fluctuations, interest rates, global or regional consumptive patterns, international supply and demand, speculative activities and increased production due to new mine developments, improved mining and production methods and international economic and political trends. The Company's revenues, if any, are expected to be in large part derived from the mining and sale of gold or interests related thereto. The effect of these factors on the price of gold, and therefore the economic viability of any of the Company's exploration projects, cannot accurately be predicted.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at August 31, 2010 the Company had current assets of \$2,765,368 and current liabilities of \$543,162. All of the Company's financial liabilities and assets have contractual maturities of less than 90 days and are subject to normal trade terms. As described in Note 4, working capital includes \$12,500 accrued fees payable to officers, which are immediately due.

9. Contingencies

Further to the Meeting of Shareholders held January 30, 2009 pursuant to which the former Board of Directors was replaced and a new management team appointed, the Company initiated an internal audit to follow up on preliminary forensic audit work undertaken in 2008 in connection with historical cash disbursements and property acquisitions.

Subsequent to the Meeting, two former officers and directors of the Company filed claims against the Company in the aggregate amount of \$610,000 relating to services allegedly provided but unpaid. Management is of the position that the claims are without merit and has advised the claimants accordingly. Management intends to defend its position vigorously should the need arise. No amounts have been accrued in these financial statements for these claims because settlement amounts, if any, are not determinable.

In conjunction with the above and pursuant to an audit by the Canada Revenue Agency ("CRA") of 2003 exploration expenses, current Management also conducted a review of expenditures incurred and filings made in respect of flow-through share issuances during the period 2003 – 2008. This review uncovered issues related to the use of flow-through funds, timing of expenditures and other related compliance matters that will require the Company to file and/or re-file certain documents with CRA related to the issuance of flow-through common shares during the review period.

The Company estimates it may incur interest charges and penalties associated with the foregoing and may incur other costs. These financial statements contain a provision of \$146,500 to reflect the interest charges and penalties that are likely under the Part XII.6 provisions in the Income Tax Act. In addition, the Company may be obligated to reimburse investors for an estimated amount of \$283,300, which has been accrued, in tax liabilities and interest due to CRA re-assessments which re-assessments are a result of flow through funds not spent within prescribed time limits. The Company is approaching CRA with a proposal to minimize payments associated with the above.

The Company has determined that it will file a claim in an amount equal to or greater than penalties, interest and any re-assessment amounts levied by CRA, against the Directors and Officers (the "former management group") retained, employed or otherwise engaged by the Company during the relevant period.
