

HARTE GOLD CORP.
Management's Discussion and Analysis of Financial Condition and Results of Operations
for the 3 months ended March 31, 2014

The following discussion of the results of operations and financial condition of Harte Gold Corp. ("Harte Gold" or "the Company") prepared as of May 13, 2014 summarizes management's review of the factors that affected the Company's financial and operating performance for the three months ended March 31, 2014, and the factors reasonably expected to impact on future operations and results ("Management's Discussion and Analysis of Financial Condition and Results of Operations" or "MD&A"). This MD&A is intended to supplement and complement the Company's unaudited condensed interim financial statements as at and for the three months ended March 31, 2014 ("Unaudited Interim Financial Statements") and the notes thereto, which were prepared in accordance with International Financial Reporting Standards ("IFRS").

Certain information and discussion included in this MD&A constitutes forward-looking information, which should be considered in view of the cautionary notes contained in the section Forward-Looking Statements at the end of this MD&A. The unaudited condensed interim financial statements, the 2013 Audited Financial Statements and the Company's Annual Information Form are available at www.sedar.com and at the Company's website www.hartegold.com. All amounts disclosed are in Canadian dollars.

OVERVIEW

Harte Gold is involved in the acquisition, exploration and development of mineral resource properties, with a current focus on gold properties located in the Province of Ontario, Canada. The Company was incorporated in Ontario, on January 22, 1982 and is a reporting issuer in the Provinces of Ontario, Alberta and British Columbia. The common shares of the Company are listed for trading on the Toronto Stock Exchange under the symbol "HRT" and on the Frankfurt Stock Exchange under the symbol "H4O".

The Company currently has interests in two gold exploration projects: the 100% owned Sugar Zone Property, located 60 km east of the Hemlo area gold mines and northeast of the town of White River as well as the Stoughton-Abitibi Property (formerly Stoughton-Porcupine), located 110 km east of Timmins and held 100% for the majority of the claims and 90% for the remaining claims.

The Company's exploration and mine development activities are focused on the Sugar Zone Property which consists of 414 contiguous claims (comprising 1,844 contiguous claim units) and covers approximately 29,300 hectares. The Property covers an entire greenstone belt which includes the Sugar Zone Deposit within a surrounding buffer zone of claims. The Property contains an NI 43-101 compliant Indicated Resource of 980,900 tonnes, grading 10.13 g/t for 319,280 ounces of contained gold (uncapped) and an Inferred Resource of 580,500 tonnes, grading 8.36 g/t for 155,960 ounces of contained gold (uncapped).

Exploration work on the Stoughton-Abitibi Property has been limited in recent years as the Company focuses on the Sugar Zone mine development and regional exploration. An airborne survey completed in Q4 2013 identified structural controls and potential drill targets on Stoughton-Abitibi which will be followed up in the near future.

SUGAR ZONE PROPERTY UPDATE

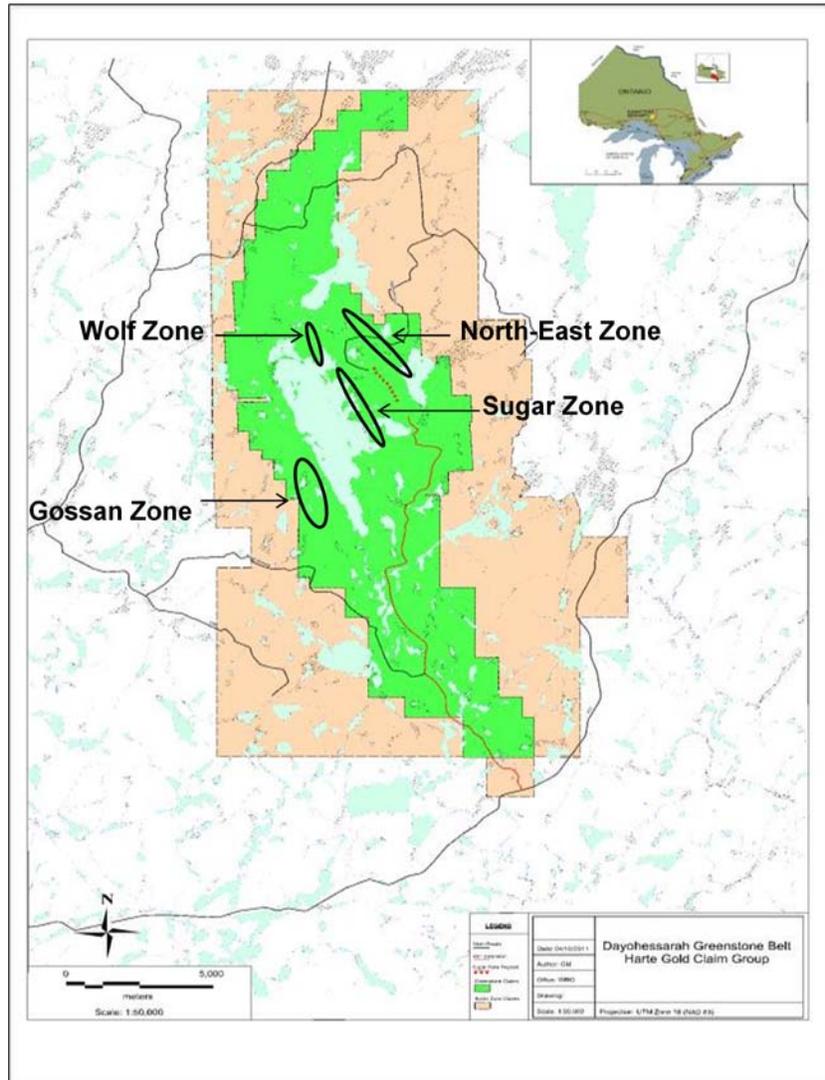

The Company has identified five principal areas of interest at the Sugar Zone Property:

- Sugar Zone Deposit - high grade 475,000 ounce gold deposit, 70,000 tonne Advanced Exploration bulk sample is approved and mine development is expected to begin Q3 2014
- Wolf Zone - mineralized zone 1.5 kilometers north of the Sugar Zone Deposit, features 9.5 g/t over 7.5 metres including a high grade core of 22.9 g/t over 3 metres
- Gossan Zone - Area of disseminated sulphide mineralization west of Lake Dayohessarah

HARTE GOLD CORP.
Management's Discussion and Analysis of Financial Condition and Results of Operations
for the 3 months ended March 31, 2014

- North-East Zone – 2 km x 5 km area with multiple IP targets, exploration program to find the source of the high grade, Hemlo style sedimentary Peacock Boulder Train currently under the supervision of Robert S. Middleton P.Eng, Drill program to follow.

The map below identifies areas of interest that are targeted for further exploration and/or development at this time.

In addition to growth potential at the Sugar Zone Deposit, the Property holds strong potential for the discovery of additional gold deposits as indicated by earlier discoveries of the Wolf Zone and Peacock Boulder Train; both of which feature Hemlo style disseminated sulphide gold mineralization.

During Q1 2014 and to the date hereof, Harte Gold completed a lakebed sediment sampling program and Induced Polarization (“IP”) survey over 2km x 5km area. The objective of these programs is to determine the source of the high grade “Peacock Boulders” which returned gold values up to 87 grams per tonne.

The lakebed sediment sampling program returned high arsenic and molybdenum values similar to the chemical signature found around the original Hemlo discovery 60 kms west of the Sugar Zone Property.

HARTE GOLD CORP.
Management's Discussion and Analysis of Financial Condition and Results of Operations
for the 3 months ended March 31, 2014

Drill targets have been identified and following fieldwork to assess the targets, a drill program will be scheduled for summer, 2014.

OUTLOOK

Harte Gold is currently working on the following initiatives:

- Underground development and mine plans for the 70,000 tonne bulk sample
- Contract mining and custom milling contracts
- Site preparation in support of the bulk sample
- Field work to assess IP Targets to be followed by a drill program as Harte Gold seeks to establish the source of the high grade disseminated sulphide Peacock Boulder train.

RESULTS OF OPERATIONS

The Unaudited Interim Financial Statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") and its interpretations adopted by the International Accounting Standards Board ("IASB").

Results of Operations	3 Months Ended March 31, 2014	3 Months Ended March 31, 2013
Net Income (Loss)	\$ 98,484	\$ 219,878
Income / (Loss) per weighted average share	\$ -	\$ 0.001

Balance Sheet	March 31, 2014	December 31, 2013
Total Assets	\$ 22,097,684	\$ 22,296,997
Cash and cash equivalents	462,061	824,189
Exploration and evaluation expenditures	21,094,589	20,959,732

During the 3 months ended March 31, 2014, the Company recorded net income of \$98,484 compared to \$219,878 for the 3 months ended March 31, 2013. The major difference relate to recognition of flow-through share premiums, which were significantly higher in Q1 2013 compared with Q1 2014.

Excluding income recognized from the flow-through share premiums, corporate costs were \$136,731 for the 3 months ended March 31, 2014 compared to \$154,825 during the 3 months ended March 31, 2013.

For the 3 month period ended March 31, 2014, the Company's cash and cash equivalent position decreased to \$462,061 from \$824,189 at December 31, 2013. Cash was used to fund exploration and general corporate expenses.

Management's Discussion and Analysis of Financial Condition and Results of Operations
for the 3 months ended March 31, 2014

Financing

During the 3 months ended March 31, 2014, the Company completed the final tranche of a non-brokered private placement of units for gross proceeds of \$180,000. During the 3 months ended March 31, 2013, the Company did not undertake any financing activities.

Corporate Expenses

The Company's policy is to capitalize all exploration and evaluation expenditures until a property becomes a producing mine or circumstances lead the Company to conclude that there has been an impairment in value. Accordingly, the results of operations reflect the Company's corporate expenses that are not capitalized to exploration and evaluation projects.

The following summarizes the major components of corporate expenses:

Expenses	3 Months Ended March 31, 2014	3 Months Ended March 31, 2013
Office and general	\$ 32,506	\$ 33,748
Management and consulting	60,000	60,000
Professional fees	10,600	19,237
Shareholder information	32,196	39,085
Flow-through share premium	(234,278)	(370,771)

- There were no significant changes between the two quarters, other than the income amount related to flow-through share premiums.
- In Q1 2013, the Company renounced the expenses related to the 2012 flow-through share issues, resulting in an income amount of \$370,771. \$234,278 was recognized in Q1 2014 and as a result of renouncing expenses related to the 2013 flow-through share issues.

SUMMARY OF QUARTERLY RESULTS

	2014		2013			2012		
	Q1	Q4	Q3	Q2	Q1	Q4	Q3	Q2
Total Revenue	\$ 937	\$ 6,336	\$ -	\$ 1,260	\$ 3,932	\$ 2,342	\$ 7,384	\$ 5,337
Net Income / (Loss)	98,484	(742,191)	(132,743)	(116,415)	219,878	(171,946)	(115,487)	(648,512)
Income / (Loss) per Share - basic and fully diluted	-	(0.003)	(0.001)	(0.001)	0.001	(0.001)	(0.001)	(0.004)

Results of operations can vary significantly by quarter, as a result of a number of factors. The Company's level of activity and expenditures during a specific quarter are influenced by the level of working capital, the availability of external financing, the time required to gather, analyze and report on geological data related to its properties and the number of personnel required to advance each project.

The timing and amount of stock option grants affects the quarters. In Q2 2012, the Company recorded stock option expense of \$470,940, \$nil in Q3 2012 and \$nil in Q4 2012. No stock option expenses were recorded throughout 2013 and Q1 2014

Income from flow-through share issuance premiums of \$370,771 was recognized in Q1 2013 compared to \$234,278 in Q1 2014. Q4 2013 includes an expense of \$532,132 in respect of deferred income taxes.

HARTE GOLD CORP.
Management's Discussion and Analysis of Financial Condition and Results of Operations
for the 3 months ended March 31, 2014

LIQUIDITY AND CAPITAL RESOURCES

The Company had a working capital surplus of \$420,574 at March 31, 2014 (working capital surplus of \$510,263 at December 31, 2013) excluding the liabilities for contingency provisions and flow-through share premiums.

During the 3 months ended March 31, 2014, \$129,063 was spent on exploration and evaluation costs for the Sugar Zone Property.

The Company expects to issue additional common shares to finance expanded exploration and evaluation programs as warranted.

The Company has relatively small contractual commitments to pay rent for office, living and core storage areas in White River, Ontario and for certain access rights to its properties, which commitments are summarized in the unaudited condensed interim financial statements.

In addition to the foregoing contractual commitments, the Company must also make various payments under its Halverson Option to acquire certain claims (remaining cash payments of \$70,000 through June 28, 2014 and no further work commitment expenditures).

The Company made application to the Ministry of Northern Development and Mines ("MNDM") in Q4 2013 for a 70,000 tonne Advanced Exploration and Bulk Sample at the Sugar Zone deposit. The application included the submission of a Closure Plan, in connection with which Harte Gold provided \$348,906 to be held in trust by the MNDM to satisfy such Closure Plan requirements. The MNDM approved the Closure Plan in February 2013 all permits required to conduct the bulk sample have been received. The Company will require additional funding to fund the bulk sample.

RELATED PARTY TRANSACTIONS

Management services by the Company's officers are provided on a contract basis, either directly or through corporate entities related to such officers. Additionally, the Company shares its premises and the costs of certain support personnel with related companies, and reimburses these related companies for its share. These transactions were in the normal course of operations and were measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

CONTINGENCIES

Pursuant to a 2009 audit by the Canada Revenue Agency ("CRA") of 2003 exploration expenses, current management conducted a review of expenditures incurred and filings made in respect of flow-through share issuances during the period 2003 – 2008. This review uncovered issues related to the use of flow-through funds, timing of expenditures and other related compliance matters. The Company filed the required documents with CRA related to the issuance of flow-through common shares during this period. The December 31, 2012 balance sheet contained a provision of \$427,425 comprised of both the probable obligation to reimburse investors as a result of flow-through funds not spent within prescribed time limits and an amount for the interest charges and penalties under the Part XII.6 provisions in the Income Tax Act. During the year ended December 31, 2013, the Company paid a CRA assessment notice in respect of the Part XII.6 interest and penalties and reimbursed investors for a total expenditure of \$323,608. The Company estimates that the remaining provision of \$103,817 is sufficient for any additional reimbursements that may be required.

The Company has filed a claim against former directors and officers of the Company that were retained, employed or otherwise engaged by the Company during the relevant period, for damages of \$750,000 relating to CRA liabilities and indemnity of \$750,000 for any amounts that has been or may need to be

HARTE GOLD CORP.
Management's Discussion and Analysis of Financial Condition and Results of Operations
for the 3 months ended March 31, 2014

reimbursed to investors. Any recovery by the Company is very uncertain so no amount has been included in the financial statements for any such potential recovery.

FINANCIAL INSTRUMENTS

As at March 31, 2014, the Company's financial instruments are comprised of cash and cash equivalents, receivables, accounts payable and accrued liabilities. The carrying value of receivables, accounts payable and accrued liabilities approximate their fair values due to the relatively short periods to maturity of these financial instruments.

The Company's cash and cash equivalents are held through a Canadian chartered bank. The Company's current policy is to invest excess cash in a money market fund administered by the brokerage subsidiary of a Canadian chartered bank.

The Company has no debt instruments.

RISKS AND UNCERTAINTIES

The exploration and development of mineral properties involves a high degree of risk, and the successful achievement of a profitable operation cannot be assured. Many exploration programs do not result in the discovery of mineralization; moreover, mineralization discovered may not be of sufficient quantity or quality to be profitably mined. Costs of finding and evaluating an ore body are substantial, and may take several years to complete. The Company must overcome many risks associated with an early stage exploration property. Outstanding items to be completed include, but are not limited to, identification and quantification of a commercially viable ore body, confirmation of the Company's interest in the underlying claims and leases, completion of a feasibility study, funding of all costs to a commercial operating venture, completion of the permitting process, detailed engineering and procurement of a processing plant, and constructing a facility to support the mining activity. Construction and operational risks including, but not limited to, equipment and plant performance, metallurgical, environmental, cost estimation accuracy, and workforce performance and dependability will all affect the profitability of an operating property.

External financing, primarily through the issuance of common shares, will be required to fund the Company's activities. There can be no assurance that the Company will be able to raise the requisite financing in the future.

OUTSTANDING SHARE DATA AS OF MAY 13, 2014

Issued and outstanding common shares	216,538,246
Share purchase warrants	27,986,225
Options	20,950,000
Fully Diluted shares	265,474,471

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Any system of internal control over financial reporting, no matter how well designed, has inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. There have been no material changes in the Company's internal control over financial reporting during the quarter ended March 31, 2014 that have materially affected, or are reasonably likely to materially affect, internal control over financial reporting.

HARTE GOLD CORP.
Management's Discussion and Analysis of Financial Condition and Results of Operations
for the 3 months ended March 31, 2014

SUBSEQUENT EVENT

On April 25, 2014 the Company issued 7,740,000 stock options to acquire common shares of the Company to Officers and Directors, Employees, Consultants and Pic Mobert First Nation. The Stock Options are exercisable at \$0.10 per common share for a period of five years from issuance. On May 9, 2014 the Company issued 150,000 stock options to acquire common shares of the Company to an employee and consultant. The Stock Options are exercisable at \$0.15 per common share for a period of five years from issuance.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING INFORMATION

This MD&A includes "forward-looking statements", within the meaning of applicable securities legislation, which are based on the opinions and estimates of Management and are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as "seek", "anticipate", "budget", "plan", "continue", "estimate", "expect", "forecast", "may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe" and similar words suggesting future outcomes or statements regarding an outlook. Such risks and uncertainties include, but are not limited to, risks associated with the mining industry, including operational risks in exploration, development and production; delays or changes in plans with respect to exploration or development projects or capital expenditures; the uncertainty of reserve estimates; the uncertainty of estimates and projections in relation to production, costs and expenses; the uncertainty surrounding the ability of the Company to obtain all permits, consents or authorizations required for its operations and activities; and health, safety and environmental risks, the risk of commodity price and foreign exchange rate fluctuations, the ability of Harte Gold to fund the capital and operating expenses necessary to achieve the business objectives of Harte Gold, the uncertainty associated with commercial negotiations and negotiating with foreign governments and risks associated with international business activities, as well as those risks described in public disclosure documents filed by the Company. Due to the risks, uncertainties and assumptions inherent in forward-looking statements, prospective investors in securities of the Company should not place undue reliance on these forward-looking statements. Statements in relation to "reserves" or "resources" are deemed to be forward-looking statements, as they involve the implied assessment, based on certain estimates and assumptions, that the reserves or resources described may be profitably produced in the future.

Readers are cautioned that the foregoing list of risks, uncertainties and other factors are not exhaustive. The forward-looking statements contained in this press release are made as of the date hereof and the Company undertakes no obligation to update publicly or revise any forward-looking statements or in any other documents filed with Canadian securities regulatory authorities, whether as a result of new information, future events or otherwise, except in accordance with applicable securities laws. The forward-looking statements are expressly qualified by this cautionary statement.
