Harte Gold holds Annual General Meeting

Toronto – July 4, 2016 - HARTE GOLD CORP. (“Harte Gold”) (TSX: HRT/FSE: H4O/OTC: HRTFF) is pleased to announce it held its Annual General Meeting of shareholders (the “Meeting”) June 29, 2016. The Meeting was very well attended with over 80 people in attendance and 51.82% of issued and outstanding common shares represented in person or by proxy at the Meeting.

Stephen G. Roman, President and CEO provided an update on the Advanced Exploration Bulk Sample (the “bulk sample”) at the Sugar Zone property and permitting initiatives related to its request for approval to increase the bulk sample by 30,000 tonnes to a total of 100,000 tonnes and, commercial production. Mr. Roman noted that wider mineralized zones encountered in the bulk sample to date (see News Release of June 28, 2016) mean the bulk sample is ahead of schedule and is providing valuable insight into the grade and continuity of the Sugar Zone deposit. Mr. Roman also reported preliminary results from the recently completed Crone Geophysics survey and noted a number of strong, untested resistivity anomalies within the 2.3km x 1.5 km survey area between the Sugar Zone and Wolf Zone deposits. A 5,000m drill program to test these anomalies is set to begin later this month.

At the Meeting, shareholders elected Richard Faucher, George A. Flach, Derek C. Rance, Stephen G. Roman, Douglas Scharf and Richard H. Sutcliffe to serve as Directors of Harte Gold. The table below sets out the voting results.
